

2016/17 RANGE

Avante (Item no: 3171225) with optional corten fascia (Item no: 3171265).

As nature's original heat source and the world's first oven, fire still has the power to stir our most primal instincts, bringing people together to relax, engage and share our most intimate moments.

At Scandia, we know how to tame fire and we are experts in designing wood fires and stoves that thrive in Australian conditions. Our world class designs and commitment to quality are inspired by Scandinavian cultural values and the craftsmanship for which they are renowned. These same values resonate throughout our organisation, instilling a passion for designing great quality, affordable wood fires.

In the harsh winters of Scandinavia, fire is essential for survival and this is also true for many Australians who rely on fire as the primary source of heating. In Australia fire is also about socialising, about bringing the outdoors in and allowing us to get back to nature. It keeps the gathering going outside as night falls when the chill in the air would send us back indoors.

At Scandia, we believe in the power of fire to bring people together. We believe in the power of Scandia to bring quality design and Australians together.

PRECISION ENGINEERING

Scandia utilises CNC laser technology and robotics to manufacture products of impeccable quality, engineered to precise specification.

TRADITIONAL RANGE

With origins forged in Australian history, the classical styling and design of our traditional range represents the pinnacle in affordable, high quality wood heating.

- Minimum 10 year firebox warranty
- Crafted Japanese fireproof glass
- Firebrick lined fireboxes
- “Clearview” glass air wash system
- High temperature stove paint

200 STACKER

This is a modern and practical adaptation of our most popular wood fire, the Warmbrite 200, with the addition of a handy wood storage pedestal designed to keep firewood dry and conveniently located.

Heat up to 200m²

Large wood storage

3 speed electric fan

670w x 560d x 860h

HEAT & COOK

Whether it's wood fired pizza on the deck or the primary source of heating, cooking or hot water, this wood fired oven is as diverse as it is functional. Featuring cast iron doors and an extra large cooktop, the Heat & Cook is the perfect addition to any indoor or outdoor living space.

-  Heat up to 200m²
-  Large baker's oven
-  Optional hot water jacket
-  770w x 620d x 950h

Item no: 3170754

SUPREMACY 200

This premium, mid size, slow combustion wood fire is engineered to deliver a unique combination of elegance, refinement, technology, sustainability and industry leading performance.

-  Heat up to 200m²
-  8mm heavy duty steel firebox
-  Soft touch fan control with infrared remote
-  730w x 580d x 730h

67% Efficiency 1.1g/kg Emissions

Item no: 3171219

CUTTING EDGE DESIGN

The Supremacy range represents the pinnacle in slow combustion wood fires. Built to last a lifetime, these beautifully styled wood fires epitomise the synergies that can be achieved when you combine functionality and quality construction with cutting edge design.

- Supreme Quality: 8mm steel firebox construction
- Supreme Style: Beautifully crafted bay window design
- Supreme Performance: Extended overnight burn times
- Supreme Confidence: 15 year firebox warranty
- Supreme Technology: Soft touch fan controls with infrared remote

SUPREMACY 300

The largest model in our premium range, the Supremacy 300 has presence in any room with its sleek lines and bay window design. This powerful, yet elegant, unit is capable of heating large, open plan homes and commercial spaces.

-  Heat up to 300m²
-  8mm heavy duty steel firebox
-  Soft touch fan control with infrared remote
-  830w x 670d x 770h

WHY CHOOSE AN INBUILT WOOD FIRE?

Everyone loves an open fire, but in reality they are inefficient, plagued by excessive fuel consumption and uncontrollable heat levels that send much of the energy produced straight up the chimney as carbon emissions. Scandia's Series 3 range of inbuilt wood fires are an ideal solution for home owners with existing open fires and who are seeking a cleaner, warmer, more sustainable wood fire. They are also ideal for the new home builder/renovator wanting the warmth, ambience and style of an inbuilt wood fire without the need for a masonry fireplace.

CONTEMPORARY RANGE

Influenced by a passion for combining indoor and outdoor living and the unmistakable elegance and style of European design, the team at Scandia has created a visionary range of radiant and open wood fires perfect for the most inspired indoor/outdoor living spaces.

- Minimum 10 year firebox warranty
- Tested and approved to AS/NZS 4012/4013 and 2918 safety standards
- Heavy duty steel construction
- Firebox liners to maximise burn efficiency

HELIX

A Scandinavian inspired design with its elegant contours and subtle lines, the Helix is the perfect centrepiece for any contemporary home. This powerful radiant heater delivers the ambience and warmth you can get only from an Australian designed wood fire.

Heat up to 200m²

Practical wood storage

Extended overnight burn times

610w x 440d x 1170h

62%
Efficiency

1.5g/kg
Emissions

Item no: 3171227

EDGE 70

Evolving from French provincial origins, the Edge's clean lines and delicate legs convey style and elegance. Expansive glass panels encase a radiant firebox, and the large top is great for cooking winter soups and stews. The Edge is a stylish wood fire designed to deliver an ethereal ambience to any indoor/outdoor living space.

-  Heat up to 320m²
-  Optional wood storage pedestal
-  Panoramic fire views with glass on three sides
-  670w x 780d x 1020h

Optional Edge Stacker (Item no: 3171267).

Item no: 3171226

AVANTE

Engineered for indoor and outdoor spaces the Avante open fireplace is as adaptable as it is stylish; uninterrupted fire views are beautifully framed by a range of four fascia options, making it the ideal centrepiece for any entertaining area.

Included with every Avante is an adjustable, stainless steel cooking plate which converts this opulent fireplace into a wood fired BBQ in a matter of seconds.

-  Indoor/outdoor open fire
-  Zero clearance option
-  5.5mm stainless steel cooking plate
-  Removable safety screen included
-  1290w x 580d x 800h

Included stainless steel cooking plate

Optional corten fascia (Item no: 3171265)

Optional stainless steel fascia (Item no: 3171266)

Avante (Item no: 3171225) depicted with supplied black fascia, corten and stainless steel fascias are optional.

ACCESSORIES

Scandia offer a complete range of fire tools, hearth pads, heater guards, spare parts and installation accessories for most brands of wood heaters sold in Australia.

If you can't find what you are looking for instore visit scandiastoves.com.au for a complete range of available items. Items not found instore can be ordered at any Bunnings Special Orders desk.

BLACK MESH DEFAULT 4M FLUE KIT

Designed and tested to suit all Scandia freestanding wood fires, the powder coated, black mesh decorative flue looks great on any of the traditional wood fire range.

- Triple skin flue
- 304 SST active flue
- 304 SST cowl and cone
- Powder coated finish

6" INBUILT 4M FLUE KIT

Designed and tested to suit the Warmbrite 200i and 300i, this flue kit is for use in an existing masonry chimney. Zero clearance flue kits are also available – ask instore or visit the website for details.

- Suits masonry installation
- 304 SST active flue
- 304 SST cowl and cone
- Chimney cover plate

SLEEK BLACK DEFAULT 4M FLUE KIT

Designed and tested to suit all Scandia freestanding wood fires, the powder coated, sleek black decorative flue looks great on any of the contemporary wood fire range.

- Triple skin flue
- 304 SST active flue
- 304 SST cowl and cone
- Powder coated finish

6" EXTENDABLE FLUE BRUSH

Clean your flue safely from ground level up to 5m with the Scandia flexible flue brush kit. Pull through and rooftop cleaning options are also supported.

- Five 1m flexible extensions
- Premium 6" poly brush
- Threaded metal connectors
- Pull through option fitted

ADDITIONAL INSTALLATION ITEMS

Additional parts required to complete your installation are available from Bunnings stores. Items not in stock can be ordered from the Special Orders desk – ask in store or visit the website for details.

- Kits available:
 - 1m Flue Extensions
 - 45° Bends
 - Roof Flashing
- Flexi Flue and Adapters
- Penetration and Drop Boxes

ZERO CLEARANCE KIT

Zero clearance kits are required when installing an inbuilt wood heater into a timber framed stud wall. Zero clearance kits are available for all Scandia inbuilt wood fires. Ask in store or visit the website for details.

- Kits available:
 - Warmbrite Zero Clearance Box
 - 6" Zero Clearance Flue Kit
 - Avante Zero Clearance Box
 - 10" Zero Clearance Flue Kit

WOOD FIRED STOVES

The Banquet is an affordable, traditional wood fired stove available with or without hot water – ask in store or visit the website for details.

Banquet Dry: 3171260 Banquet Wet: 317126

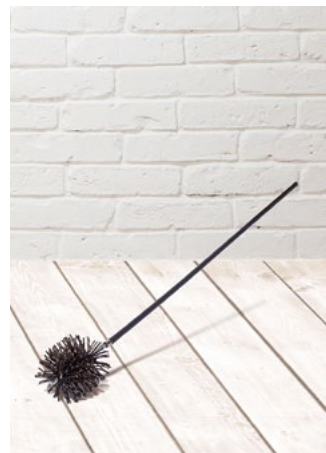

Item no: 3180672

Item no: 3170671

Item no: 3171234

Item no: 3180729

SMALL CHILD SAFETY GUARD

This sturdy child safety guard minimises the risk of coming into contact with what can be extremely hot surfaces. Suits most mid size wood fires.

- Heavy duty steel construction
- Dual opening door (685w x 600h)
- Rear stabilising bar
- Size (mm): 1080w x 1055d x 800h

LARGE CHILD SAFETY GUARD

This sturdy child safety guard will minimise the risk of coming into contact with what can be extremely hot surfaces. Suits most large wood fires.

- Heavy duty steel construction
- Dual opening door (860w x 600h)
- Rear stabilising bar
- Size (mm): 1275w x 1275d x 800h

CLASSIC FIRE TOOL SET

Forged from steel, The Classic set of fire tools are durable and robust and would complement any contemporary wood fire.

- 1 x Fireside brush
- 1 x Fireside shovel
- 1 x Ash scraper
- 1 x Fire poker
- 1 x Stand

DELUXE FIRE TOOL SET

Steel construction with ornate timber handles, The Deluxe fire tool set is the perfect accessory for any traditional wood fire.

- 1 x Fireside brush
- 1 x Fireside shovel
- 1 x Ash scraper
- 1 x Fire poker
- 1 x Stand

CERAMIC TILE HEARTH – CORNER INSTALL

This modern, black, ceramic tile hearth pad is made from durable, non-combustible materials, is easy to install and available in two sizes; suitable for all wood heater brands.

- Steel angle frame on all sides
- Available in two sizes (mm):
 - 1250 x 1250 Item no: 3171005
 - 1425 x 1425 Item no: 3171006

CERAMIC TILE HEARTH – STRAIGHT WALL

This modern, black, ceramic tile hearth pad is made from durable, non-combustible materials, is easy to install and available in three sizes; suitable for all wood heater brands.

- Steel angle frame on all sides
- Available in three sizes (mm):
 - 1050 x 1050 Item no: 3171001
 - 1050 x 1200 Item no: 3171003
 - 1200 x 1200 Item no: 3171004

SLATE HEARTH – CORNER INSTALL

This traditional, slate hearth pad is made from durable, non-combustible materials, is easy to install and available in two sizes; suitable for all wood heater brands.

- Decorative aluminium edge
- Available in two sizes (mm):
 - 1250 x 1250 Item no: 3180690
 - 1425 x 1425 Item no: 3180691

TECHNICAL INFORMATION

PROFESSIONAL INSTALLATION

Scandia requires all wood heaters to be fitted by a qualified, licensed installer whose work complies with local council regulations, Australian standards and manufacturer's specifications. Failure to correctly install is extremely dangerous, will void any warranty claims and may compromise any future insurance claims.

For a professional installation we recommend calling **1300 FIDDIT (1300 343 348)** or book online at **www.fiddit.com.au**

CLEAR SKIES, CLEAR CONSCIENCE

When you purchase a Scandia wood fire, you can be confident in the knowledge that you are purchasing the only sustainable and most affordable renewable source of home heating available.

As a supporter and sponsor of Landcare Australia, Scandia is mindful of any impact on the environment. Therefore, it's reassuring to us to know that 98 per cent of hardwood burnt in Australia is sustainably sourced, and by choosing to burn this firewood in a Scandia wood fire, you will generate no additional CO2 emissions than if that same wood were left to decompose naturally in the bush. (*Kerryn Paul, 2003*)

To control the amount of emissions released into the environment, Scandia designs all combustion wood fires with a two stage, primary and secondary air system. While the primary air controls the rate of burn, the secondary air system hyper-heats any excess carbon, converting the majority of residual emissions into energy which is then stored in the firebricks and firebox, improving overall efficiency of the heater and minimising any impact on the environment.

As an organisation, Scandia is committed to helping the environment through the promotion of renewable energy, sustainable harvesting practices and a commitment to programs that focus on reducing carbon emissions.
